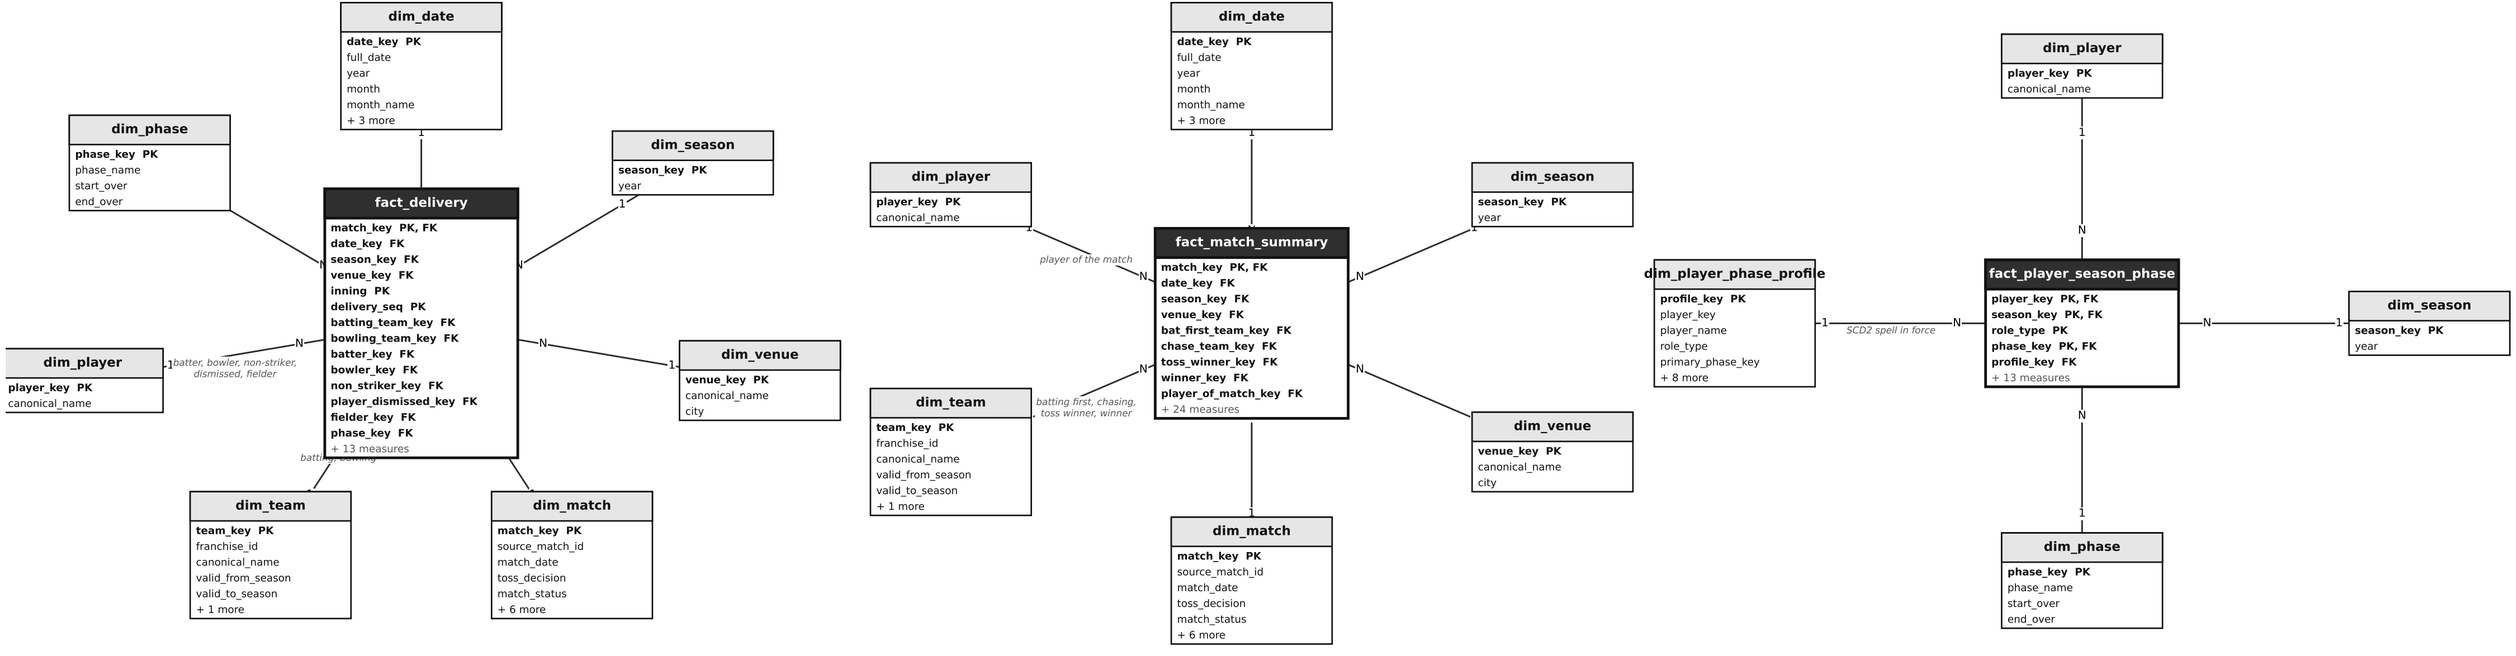
IPL Phase-Performance Data Warehouse: star schema

Three stars, one per fact table, sharing 8 conformed dimensions (the same dim_date, dim_season, dim_venue, dim_match, dim_team, dim_player and dim_phase tables appear in more than one star). 25 foreign keys, all fact to dimension (N to 1); no dimension references another.


Italic labels name the roles of a role-playing dimension. dim_player_phase_profile is SCD Type 2: one row per spell, linked to the season fact by profile_key.
